Use RFID Tracking Technology to
Automate, Manage and Control
Laundry Operations

LAUNDRY MANAGER

We Have the Best Asset Management System for Laundries, Period!

The Laundry Manager system tracks the movement of every tagged item from the laundry to each hotel, leaving and returning. It also automatically sends reports to accounting for invoicing customers and to purchasing when inventory needs replenishing. Our advanced software can track any amount of laundry from any number of hotels. No need to worry, we've got you covered!

Automate Your Processes

- ✔ New linen arrives with tags installed or they are tagged at the laundry
 - ✔ Each piece of linen is automatically added to the inventory
 - ✔ Linen is placed in numbered hampers by type
 - ✔ Linen is scanned to appropriate hotel
 - ✔ RFID tags are read at portals placed in the loading dock doors
 - ✔ Track up to 900 items at a time with a 99.9% accuracy rate
-

Manual Tracking Systems are Labor Intensive and Inaccurate

RFID tagged items are scanned in one pass simply by wheeling a bin near RFID readers. Every item is scanned, to and from the laundry! Laundry Manager tracks every tagged linen & garment with no limit on hotels tracked. Customer complaints are reduced by more reliable asset accounting.

Laundry Manager Features Extensive Reporting Capabilities

- ✔ **Outstanding Linen Report:** Laundry items not returned.
 - ✔ **Dispatch Report:** Assets sent to the hotel by laundry.
 - ✔ **Received Report:** Items received from hotel for laundry service.
 - ✔ **Inventory Summary & Detail Reports:** Listing and description of condition for items in inventory.
-

Laundry Manager Key Benefits

- ✔ Reduction of conflicts with customers
- ✔ Asset visibility from purchase to rag-out
- ✔ Increase in productivity at the laundry
- ✔ Accurate reporting and improved replacement decision making
- ✔ Significant decline in losses in inventory
- ✔ A major reduction in usage of rental items
- ✔ Billing reports are generated when items are shipped

HERE'S THE FLOW:

HOTEL

Truck delivers laundry to the hotels.

HAMPER READING STATION

SHIPPING/STORAGE

Clean laundry is picked from the inventory storage area and packed for delivery.

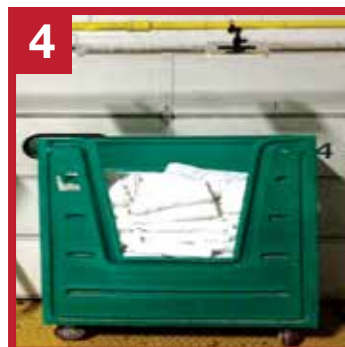

All items with RFID tags are defined in the software.

SOILED LINENS

At the laundry, the soiled bins are taken from the truck to the Hamper Reading Station.

LAUNDRY

Soiled laundry is sorted, washed and pressed.

HAMPER READING STATION

Hand-held scanners take inventory in real-time.

- Reading Stations can scan up to 900 items per second in a single pass.
- All inventory accomplished without touching a single item.

MANAGE INVENTORY. REDUCE COST.

UNIFORM MANAGER
