

TOWEL MANAGER

FOUNDATION
LOGICSYSTEMS

A Robust RFID Solution to
Help You Manage and Maintain
Your Towel Inventory

TOWEL MANAGER

The Best System Around to Control Towel Assets!

Towel Manager is a pool towel tracking and management system specifically designed to control and automate towel operations at hotels, resorts, casinos and spas. A washable RFID tag is sewn into the seam of every pool towel. The RFID tag provides each towel with a unique identification number, allowing your staff to know where each and every towel is at all times.

Tracking and Controlling

- ✔ Guest swipes their room card to identify themselves
 - ✔ Towel is handed across the counter to the guest
 - ✔ An RFID scanner located under the counter reads the tag number
 - ✔ Towel is allocated to the guest's hotel record
 - ✔ Soiled towel is scanned automatically upon return and dispatched to the laundry
-

Reduce Employee Hours

All soiled items are scanned at one time when sent to the laundry, and towels distributed to guests are automatically registered to that guest by a scanner under the clean towel counter. New asset purchases are also scanned and entered into inventory automatically.

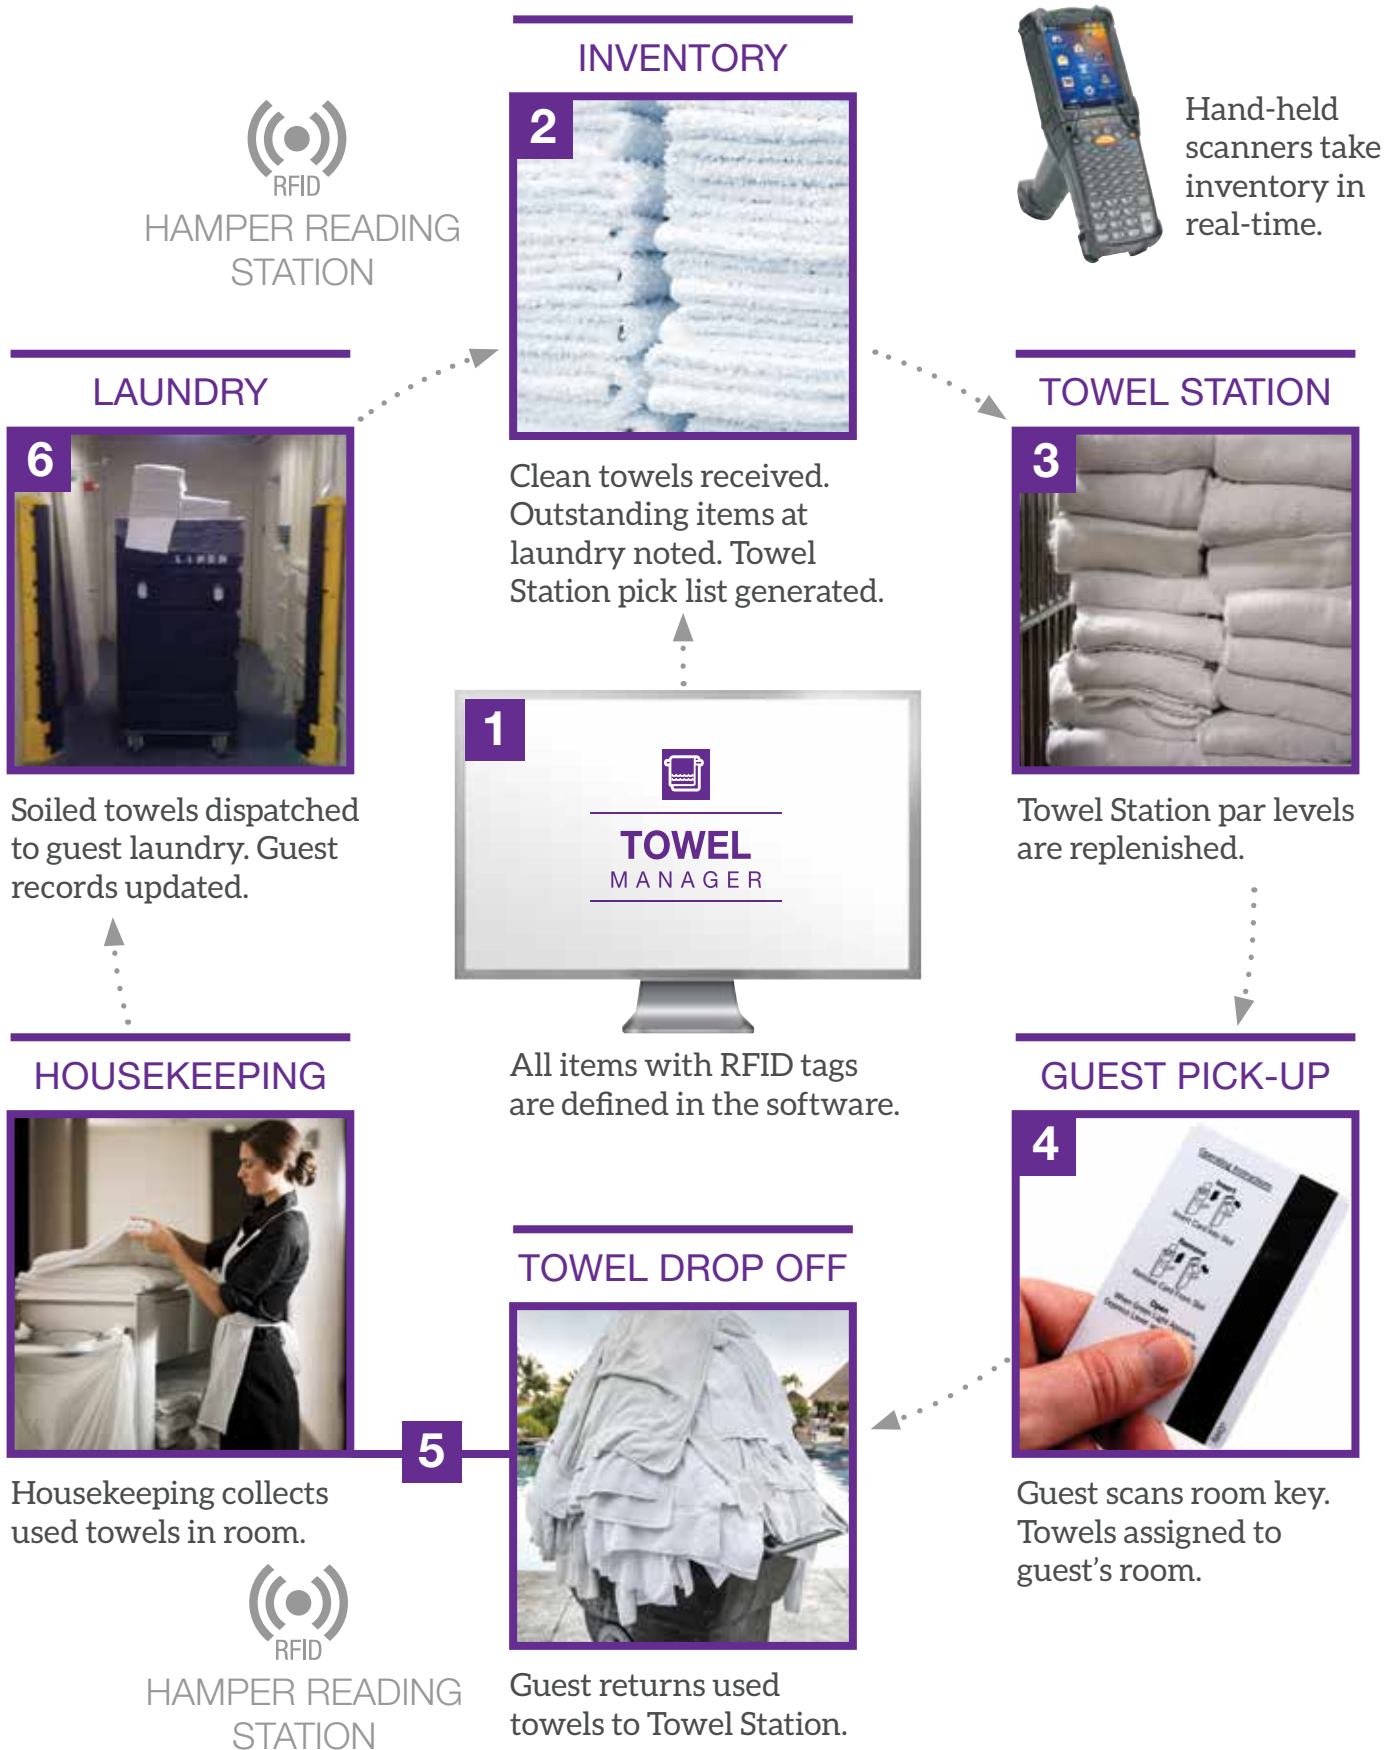

Towel Losses Eliminated

All towels given out are automatically registered to the guest. When the towel is returned, it is taken off of the guest's record and all unreturned towels are billed to the guest's room.

Towel Manager Features Extensive Reporting Capabilities

- ✔ **Outstanding Linen Report:** For all items not returned from cleaner.
- ✔ **Inventory Summary Report:** Listing of specific quantities in inventory.
- ✔ **Required Purchases Report:** Purchases needed to bring inventory to required par level.
- ✔ **Guest Accountability:** Know about towels not returned by guests.

HERE'S THE FLOW:

MANAGE INVENTORY. REDUCE COST.
